PROFESSIONAL SUMMARY

Frontend-focused MERN Stack Developer with 4+ years building scalable, high-performance, responsive web applications. Specialized in React.js, Next.js, and TypeScript, with strong experience in reusable component libraries, centralized state management (Redux Toolkit), and rich data visualization (Highcharts, ECharts, MUI/TanStack data grids), plus exposure to micro-frontend architecture. Skilled in clean architecture, performance optimization, responsive UI/UX, accessibility, and component testing (Jest, React Testing Library). Comfortable across the full stack with Node.js and Express, and experienced with AI-assisted development workflows (Claude Code, OpenAI Codex). Also build cross-platform mobile apps with React Native on a freelance basis.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native (freelance), Redux / Redux Toolkit, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Material UI (MUI), TailwindCSS, Highcharts, Responsive Design, i18next

Frontend Architecture: Component Libraries, Monorepos (Lerna, Yarn Workspaces), React Router, TanStack Table, Micro-frontends (exposure)

Build & Tooling: Vite, Babel, ESLint, Husky, Chrome DevTools, VS Code, Postman

Testing: Jest, React Testing Library, Supertest, Mocha

Backend (Full-Stack): Node.js, Express.js, RESTful APIs, Swagger / OpenAPI, JWT, OAuth, Biometric Auth, Payment Gateways, In-App Purchases

Databases: MongoDB, Mongoose, PostgreSQL, PostGIS, MySQL

Cloud & DevOps: AWS (S3, EC2), Docker, CI/CD, Git, GitHub, GitLab, Bitbucket

AI Tools: Claude Code, OpenAI Codex, AI-Assisted Development Workflows

Methodologies: Agile / Scrum, Clean Code, Code Review, Performance Optimization

PROFESSIONAL EXPERIENCE

Frontend / MERN Stack Developer

SpiderWeb Technologies / Knovatek Inc.

Jun 2025 – Present

Canada (Remote)

- Build and maintain responsive, high-performance user interfaces with React.js, Next.js, and TypeScript, following modern UI/UX and accessibility best practices.
- Develop reusable, maintainable frontend architectures and shared component libraries using Redux Toolkit and Material UI to accelerate delivery across teams.
- Integrate RESTful APIs, JWT / OAuth authentication flows, and secure payment gateways into client-side applications.
- Apply AI-assisted development workflows with Claude Code for rapid feature development, debugging, refactoring, and documentation.
- Test, debug, and optimize components using Jest, Supertest, and Chrome DevTools; deploy via AWS EC2/S3 and Docker.

Frontend / MERN Stack Developer

Cisconic Pvt. Ltd.

Mar 2022 – Jun 2025

Hyderabad, India (Remote)

- Led frontend feature development on **RevolutionM 2.0**, an enterprise revenue & trade-promotion planning platform in React 18 and TypeScript, built within a Lerna + Yarn Workspaces monorepo — with hands-on exposure to micro-frontend architecture.
- Built core feature modules — scenario planning, approval workflows, and interactive dashboards — and engineered shared component/service libraries with centralized Redux state, Okta SSO, and i18n.
- Delivered rich data visualizations using Highcharts, jVectorMap, and TanStack/MUI data grids; established CI/CD pipelines with semantic-release and Husky commit linting.

- Built the React 18 + TypeScript **Patient Portal** SPA with modules for appointments, billing, lab reports, and prescriptions, and a personalized health dashboard with interactive Highcharts visualizations (Redux Toolkit, React Router v6, MUI v5, Jest/RTL).
- Delivered additional full-stack platforms including a Real Estate management system and a Vegetables E-Commerce store with catalog filtering, cart/checkout, and payment-gateway integration.
- Participated in Agile ceremonies, mentored junior developers, and conducted code reviews to maintain high code quality.

Full Stack Web Developer (Intern)

Neeta Tech Tyre Pvt. Ltd.

Jan 2020 – Jul 2020

Pune, India (On-site)

- Developed the Doctor On Door Lifeline healthcare platform as part of the core development team.
- Built key frontend modules and integrated REST APIs with the user interface for seamless data flow.
- Assisted in early-stage application development, testing, and debugging across the full stack.

SELECTED FRONTEND PROJECTS

CarChaser — Multi-Portal React Marketplace. Online vehicle auction & marketplace built as a Yarn-workspaces monorepo serving five role-based React 18 portals (Admin, Agent, Dealer, Seller, Export Buyer) that share a common component package. Features real-time live auctions and bidding (Pusher), wallet management, PDF invoicing, PayPal/Flutterwave payments, and full i18next localization — built with Redux Toolkit + redux-persist, MUI 7, Formik/Yup, and React Router 6.

ShowPhaze — B2B SaaS Workforce Platform (Frontend). Full-scale React 18 SaaS app (Vite) with role-based portals (Admin, Client, Coordinator, Freelancer, Contractor), end-to-end e-signature workflows, interactive analytics (ECharts/Recharts), Google Maps, and dynamic PDF/Excel export.

React Native Mobile Apps (Freelance). Build cross-platform mobile applications with React Native, including responsive UI, navigation, REST API integration, and authentication flows.

EDUCATION

Master of Computer Science (MCS)

MES Garware College of Commerce (Autonomous), Savitribai Phule Pune University

2018 – 2020

Bachelor of Computer Science (BCS)

Rayat Shikshan Sanstha's Dada Patil Mahavidyalaya, Savitribai Phule Pune University

2014 – 2018

LANGUAGES

English, Hindi, Marathi
